

On behalf of Five Star Race Car Bodies, we would like to welcome you into the Five Star Racing Windows SCCA Contingency Program. We are excited about our increased exposure into road racing and we are certain you will be pleased with the products we have to offer. With over 35 years in business, Five Star is the most well-known and highly respected polycarbonate window supplier in the world of motorsports, providing racing windows to top markets like NASCAR, NHRA, Trans-Am and SCCA. We are also the number #1 supplier of windows for short track racing around the globe.

Five Star is proud to bring safety to the forefront by ensuring superior protection to the driver. Polycarbonate is 200 times stronger than glass, thus allowing foreign materials that may hit your windshield during competition to deflect off and preventing any damage. In rare instances when a break in a polycarbonate window occurs at the track, teams can replace their windshield on the spot within minutes.

Polycarbonate windows are an excellent alternative to glass. Glass windows continually need to be replaced due to breakage during racing events. Replacement costs can be expensive and a nuisance during competition. In some cases having a broken window will prevent you from continuing in competition. Save "half" the weight in glass and put your safety first by choosing Five Star polycarbonate windows!

We want you to have a clear path to victory. By using Five Star Racing Windows, we will provide you with the highest optical grade of polycarbonate on the market today. Our state of the art mar-resistant coatings provide exceptional protection against scratching, along with chemical, sandblast and abrasive resistance.

Five Star also provides a variety of products to the road racer including light weight mirrors, window install kits, rivets, body bracing, window braces and our all NEW anti-fog enhancer and window cleaner Optix Plus.

If you have any questions about Five Star products, you can contact me direct at (262) 877-2171 or by emailing [SteveEinhaus@fivestarbodies.com](mailto:SteveEinhaus@fivestarbodies.com)

We look forward to seeing you all at the races!

Sincerely,

**Stephen Einhaus**
